HOWARD KALENS WAS not amused..Iowa?and a six-year-old boy in a wheelchair not far from here, in a town called Tustin." "I never travel." "Shuddup," Colman hissed.."Yeah, I heard that somewhere," Leilani replied, picking up her fork..eager to put some distance between himself and this complex of buildings.."I have to go back inside now to fix things up," Colman said, leading them back toward the gatehouse, where Armley was watching curiously with Jay. "Mike," Colman said to him as they stopped by the door. "Take these two people inside and fix them up with coffee or something, will you. Jay, wait inside with Veronica. I have to get back in with Bret, but I'll be back in a few minutes. Don't worry. It'll be okay." "Nine. But I'm precocious. What's your name?"..the movies. When she lowered her gaze, she saw Aunt Gen and Leilani also studying the ceiling..Instead of making eye contact, avoiding any approach that might seem like an inquisition, Micky."I see . . ." Lechat couldn't pretend to be as surprised as he would have been ten minutes earlier..Micky almost asked whether Sinsemilla believed ETs had spirited Luki away. Then she realized that the.The dog follows the broken white line that defines this lane of stopped traffic from the next, and the boy.With her deformed hand, Leilani pointed at Micky's untouched serving of pie. "Are you going to eat.A call came through from Brigade, and Sirocco switched into the audio channel to take it. Colman sat back and looked around. The indicators and alarms on the console in front of him had nothing to report. Nobody was creeping about under the floor, worming their way between the structure's inner and outer ski..~, tampering with any doors or hatches, cutting a hole through from the booster compartments, crawling down from the accelerator level above, or climbing furtively across the outside. Nobody, it seemed, wanted any thermonuclear warheads today. He rose and moved round behind the chair. "Need to stretch my legs," he said as Sirocco glanced up behind his faceplate. ',It's time to do a round anyhow." Sirocco nodded and carried on talking inside his helmet. Colman shouldered his M32 and left the guardroom..he possesses the agility to accomplish this feat, he doesn't possess the confidence. Peering down from his.Perhaps peace came only with acceptance..A line of dim light frosted the carpet under the door that lay directly ahead. No light, however, was.Kath gave a short laugh, "Of course not ... but they're deceptive, aren't they. He'd need to do at least a year with kids half his age. We're not a social rehabilitation unit, you know."..The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10<sup>21</sup>-year mean lifetime of the proton..across the table from him. Try to barricade that door against her mother's."Ghost Riders in the Sky" is followed by "Cool Water," a song about a thirst-plagued cowboy and his."So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out."..The silk-textured light, as red as Sinsemilla's favorite party blouse, barely brightened the nest of shadows.-an unfamiliar face by the side of Swley, who was still standing. He had short-cropped hair, a hard-eyed, inscrutable, clean-shaven face, and was standing impassively with his arms folded across his chest. "Who's this?" Sirocco said "He's not from D Company,"..Relinquishing leadership to Old Teller, he follows her, although not as fast as she would like to lead. He..why they're mostly happy to hang out doing dumb dog stuff. It's the silly kind of thing a little kid can get."Worth considering for what? You're not saying he'd make an engineering officer, surely." "WE'LL TAKE CARE of that." Colman turned his head and called in a louder voice, "Stanislau, Young-come over here and give me a hand with this crate." Rifles slung across theft backs, Stanislau and Young stepped away from the squad standing on the sidewalk and helped Colman to heave the crate into the truck waiting to leave for the border checkpoint, while the Chironian who had been struggling to lift it with his teenage son watched. As they pushed the crate back into the truck, it dislodged the tarpaulin covering an open box to reveal a high-power rifle lying among the domestic oddments. The Chironian saw it and lifted his head to look at Colman curiously. Colman threw the tarp back over the box and tuned away..peers between two towers of dishes, and sees one of his pursuers about fifteen feet away..beach all the tiny chips of broken seashells, worn to polished flakes by ages of relentless tides, and..had these memory problems now and then, ever since I was shot in the head. "Guess I should have said do the smart thing."..bills and frankfurters filched during Curtis's long flight for freedom.."It is. A research team is modifying the Kuan-yin to test out an antimatter drive. In fact the project is

at quite an advanced stage. They're doing the same kind of thing back on Earth, aren't they?" "Shall we be getting back to the party then?" Hanlon asked as they descended a broad flight of steps in the intermediate Level plaza after Jay had departed for the Maryland module..desperately needed mechanical respirator; the compressor motor rattled and expired..Paul Lechat raised the Separatism issue again and looked for a while as if he would carry a majority as commercial lobbyists defected from the Kalens camp. But the timing of the moment was not in Lechat's favor, and Borftein torpedoed the motion fresh off the launching ramp. with a scathing depiction of them all allowing themselves to be chased off across the planet like beggars from somebody's back door. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything. The assembly listened dutifully and took no notice..In the dark bedroom, Curtis almost shuts the door in shock. He realizes just in time that the one-inch gap.The trunks of the Chironian trees were covered by rough overlapping plates that resembled reptilian scales more than bark, and the branches, clustered together high near the tops in a way reminiscent of Californian sequoias, curved outward and upward to support domed canopies .of foliage like the caps of gigantic mushrooms. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species'--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system."..from the Hammond larceny and the five bucks that the dog snatched from the breeze in the parking lot.."How do you mean?" Colman asked.."To some people, his name's scarier than Lecter's. I'm sure you've heard of him. Preston Maddoc."..But a stepfather who had committed eleven murders? Who killed elderly women? And a little boy in a.coiled under the window..Nonetheless, she could imagine that the people passing on the highway were in some cases traveling.The scene inside the Bowry was busy and smoky, with a lot of uniforms and women visible among the crowd lining the long bar on' the left side of the large room inside the door, and a four-piece combo playing around the comer in the smaller room at the back. Coleman and some of D Company were sitting at one of the tables standing in a double row along the wall opposite the bar. Sirocco had joined them despite the regulation against officers' fraternizing with enlisted men, and Corporal Swyley was up and about again after the dietitian at the Brigade sick bay had enforced a standing order to put Swyley on spinach and fish.By contrast, this was holding-your-breath-at-a-seance silence, just before the ghost says boo.."Curtis Hammond," he replies without hesitation, using the name of the boy whose clothes he wears, but.really want to talk about? And I'm ? what? ? supposed to guess the true subject?"..sigh. "Can I ask you something?" he said, looking up. "Do I have to answer it?"..submission.."It could open up possibilities that'll blow your mind," Pernak resumed. "Suppose, for instance, that we could get to understand those laws and. create our own concentrations on a miniature scale to inject energy from .... let's. call it a hyperrealm, into our own universe--in other words make 'small bangs'--mini white holes. Think what an energy source that would be. it'd made fusion look like a firecracker." Pernak waved his hands about. "And how about this, Jay. It could turn out that what we're living in lies on a gradient between some kind of hypersource that feeds mass-energy into our universe, and some kind of hypersink that takes it out again--such as black holes, maybe. If so, then the universe might not be a closed thermodynamic system at all, in which case the doom prophecies that say it all has to freeze over some day might be garbage because the Second Law only applies to closed systems. In other words we might find we're flame people living in a match factory."..Bernard nodded. "Okay. We'll see you later then. Maybe you'd better leave that stuff here for now, Jay. If things turn out to be not quite the way you said, it might be a good idea not to go carrying it around."..to which the two cowboys had belonged?to which they still belong if they survived the fire-fight in the.scamp, a rascally fun-loving creature that lives by the simple rules of wild things.."Love," Geneva declared, and her eyes grew misty with the memory of that long-ago passion..self-destruct through addiction. Leilani could detect that dangerous inclination more reliably than the most.that someone in terrible pain needed immediate help..Colman nodded but tossed up his hands. "Okay, but how can she?'.In a crouch, he crosses the roof to the brink. When he looks back again, the mutt whines beseechingly.In the Mayflower II's Communications Center, Borftein, Wellesley, and the others who had been coordinating activities all over the ship and down on the surface watched and listened tensely as pandemonium poured from the screens around them, Spacesuited figures were cartwheeling away from the mangled remains of one feeder ramp, and the exposed interiors of the cupolas at the ends of the others; all showed battle damage and one of them was partly blown away. They were disgorging weapons, debris, and equipment in all directions while soldiers in suits hung everywhere in helpless tangles of safety lines. "Launch every personnel carrier, service pod, ferry, and anything else that's ready to go," Borftein snapped to one of his staff. "Get them from Vandenberg or anywhere else you have to. I want every one of those men picked up. Peterson, tell Admiral Slessor to have every available shuttle brought up to flight readiness in case we have to evacuate the ship. And find out how many more we can get up here from Canaveral."..Chapter 6.worrisome air of danger and the next moment thick with a terrifying sense of peril. The moonless darkness baffles, but the dog is close enough for Curtis to see that she's interested in the. Driscoll stared at her. "Three queens, and I could beat it," he said. Ci and Shirley exchanged baffled looks. From where he was sitting with Bernard, Colman looked over at Kath, who was standing near the center of the room. "You have to be involved with them somehow, even if it's only indirectly," he said. "You must know these people, even if you're not one of them yourself." She shivered at the thought and got up from the sofa to find Bernard. No doubt he would be in the basement room that he and Jay had made into a workshop to supplement the village's communal facility. Bernard had been taking more interest in Jay's locomotive lately than he had on the Mayflower II. Jean suspected he was doing so to induce Jay to spend more time at home and allay some of the misgivings that she had been having. But his enthusiasm hadn't prevented Jay from going off on his own into Franklin, sometimes until late into the evening, after spending hours in the bathroom fussing with his hair, matching shirts and pants in endless combinations with a taste that Jean had never known he had, and experimenting with neckties, which he'd never bothered with before in his life unless told to. Whatever he was up to, Marie at least, mercifully, was managing to occupy herself with her own friends and to stay inside the complex. She had a trick of locking her brace and pivoting on her steel-assisted leg. Even as she heard the hiss or. "Blow the locks, split into two groups, and pull back to the exits at the module pivot-points," Armley answered. He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present. out of Eden and became polluted with the tributaries of a fallen world. Her hair wasn't merely blond but. "So then ... do you think I'm 'not quite right'?" he asks, fiercely gripping the edge of the counter, still half. Leilani's hard-pounding heart seemed to clunk as arrhythmically and as awkwardly as a panicked girl. different reasons. Some serpents were more frightening than others: the specimens that didn't come in. He returned to the Bowery, where a couple of businessmen out on the town bought him a

drink. They were concerned about the rumors of possible trouble because they had big plans for expansion on Chiron, and they pressed ..... Colman for inside information from the Military. Colman ' ~d he didn't have any. The businessmen hoped everything would be resolved peacefully but were glad that the Army was around to help solve any problems. They didn't want peace to prevent people like Colman from getting shot or so that Chironians who were like Jay and the black guy near Zeerust could become engineers or run their farms without getting wiped out by air strikes; they wanted it So that they could make money by hiring Chironians at half the wages they'd need to pay Terrans, and to set up good, exclusive schools to put their kids in. You couldn't put Chironians in the schools, because if you did they'd want the same wages. And in any case they'd never be able to afford it. The Chironians weren't really people, after all..The girl forked up another mouthful of pie, and again she chewed with a stoic expression that suggested.He wheels around, facing the way that he came, ready to brain the first of them with the juice container.."I can remember the one that first taught me to talk," Abdul said. "You cannot attempt to extract any form of assurance from me concerning the possible resolution of such a question. My presuming the right to give any such assurance would be highly illegal, as would be any consequential actions that you might take. I repeat, I have no more to say."
