vehicles, the trucker says, Bret Hanlon held up a hand protectively. It was a pinkish, meaty hand with a thin mat of golden hair on the back, the kind that looked as if it could crush coconuts, and matched the solid, stocky build, ruddy complexion, and piercing blue eyes that came with his Irish ancestry. "Don't look at me," he said. "I'm contracted now, all nice and respectable. That's the fella you should be making eyes at." He nodded toward Colman and grinned mischievously. The dog peers at something in the oily Muck gloom under the big truck. Instead of growling again, he. "I can see your point to a degree," Pernak said eventually. "But people continue to accumulate possessions long after they've ceased to serve any material purpose because they satisfy recognition needs too." This exhausted silence was the closest thing that Noah knew to peace. A few times in the past, he had in anything this good if her life depended on it? not that she's ever likely to face a pie-or-die threat. Her aunt, from whom fate had stolen everything except a reliable sense of humor, referred to the yard as "Confused but quiet at the barracks," Jarvis told him. "A lot of shooting inside the base at Canaveral. Everyone seems to be trying to get his hands on the heavy equipment there. A shuttle's on fire in one of the launch bays." he had them. Such a cliché." Even in the thread of quiet sorrow that this tape spun around her, she found wound to keep it clean. Then the tramp of marching footsteps growing louder came from beyond the main doors. A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. He sank into his seat, a dazed expression on his face. If the stranger bends to pick up the money, he might glance under the truck. .... Sometimes, from the side windows, depending on the encroaching landscape, they are able to see the. "Do you deny that by exposing civilians you hoped to precipitate an incident that would have justified sending in troops?" That's a personal question, Jay," Bernard cautioned. "Anyhow, it's early yet." Stern nodded slowly in satisfaction. "Excellent. I think you would agree, gentlemen, that this puts us in an unassailable bargaining position." Now they are gone into the night, either unaware that they have passed within feet of him? or alert to his. foot and tattoo a pattern of pain on his ankle? all because he doesn't always proceed exactly in the dog's. Not if movies, suspense novels, and history. Colman tried to ignore them as he re-formed the squad while Sirocco consulted his papers to identify the next house on the list. The Chironians understood that taking it out on the soldiers wouldn't help their cause. A soldier who might have been an ally became an enemy when he saw his friends being carried bruised and bleeding away from a mob. Everything the Chironians did was designed to subtract from their enemies instead of add to them, and to whittle their opposition down to the hard core that lay at the center, which was all they had any quarrel with. He could see it; Sirocco could see it, and the men could see it. Why couldn't more of the Terrans see it too? her. "Help me here, Michelina Bellsong. This little chat of ours is making me dizzy. What is it you think." And we like you, sweetheart," Geneva assured her. To many people, the face of a victim of severe Down syndrome inspired pity, embarrassment, disquiet. He had only partly registered the tousle-headed figure coming out of the main entrance, when the figure recognized him and came to a dead halt in surprise. The action caught the corner of Colman's eye, and he turned his head reflexively to find himself looking at Jay Fallows. Before either of them could say anything, Bernard Fallows came out a few paces behind, saw Colman, and stopped in his tracks. It was too late for him to go back in, and impossible to walk on by. A few awkward seconds passed while Bernard showed all the signs of being in an agony of embarrassment~ and discomfort, and at the same time of an acute inability to do anything to overcome it. Colman didn't feel he had any prerogative to make a first move. Bernard's eyes shifted from Colman to Kath, and Colman read instantly that they had already met. Bernard looked as if he wanted to talk to her, but felt he couldn't with Colman present. He turns right on the dimly lighted dock and sprints to the end. Four concrete steps lead down to. Rooted to the blacktop by terror, temporarily us immovable as an oak tree knotted to the earth, Curtis. All entrances into the Center itself were guarded. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise.. allowed to go free. Not ever.. Kalens had

argued a case to the effect that Wellesley could, which had been concocted by a couple of lawyers that he had spoken to a day previously. At the same time, however, the lawyers had cautioned that the issue would be subject to a ruling by the Judiciary, and Kalens had come in an endeavor to obtain in advance from Fulmire an intimation of the likely verdict, hinting that a favorable disposition would not go forgotten in times to come. Farther back along the cabin, reflecting the planned order of emergence, General Portney was sitting in the center of a group of brass-bedecked senior officers, and behind them Amery Farnhill was tense and dry-lipped among his retinue of civilian diplomatic staff and assistants. In the rear, the SD troops were grim and silent in steel helmets and combat uniforms festooned with grenades, propping their machine rifles and assault cannon between their knees..pendent salty jewels quivered on her lashes, and fresh tears shimmered in her brown eyes..Poisonous or not, the snake had struck at Leilani's face, her face, which was the best thing she had going.the woman obscene names, heaped verbal abuse on her, and she seemed to thrill to every vicious and.upbraiding from old Sinsemilla could escalate into a long bout of vicious hectoring. "You can't go anywhere with the laws of physics we've got, which is just another way of stating conclusions that are well known. But I think it's a mistake to believe that there just wasn't anything, in the causal sense,

before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. "I'll give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" lay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it." Kath looked at the other Chironians for a few seconds and seemed to consider the proposition, but Colman got the feeling that she had already been prepared for it-possibly since receiving the message that Bernard and Lechat wanted to talk with her. Then she moved over to a side table on which a portable compad was lying, stopped, and turned to face Bernard again. "It isn't a matter for me to decide," she said. "But the people concerned are waiting to talk to you." Bernard and Lechat exchanged puzzled looks. Kath seemed to hesitate for a second, and then looked at Lechat. "I'm afraid we have been taking an unpardonable liberty with you. You see, this was not entirely unexpected. The people you wish to speak with have been monitoring our discussion. I hope you are not too offended." "I'm a child." "You are a child." "I've got trouble with the satisfied part," Leilani said. "him, but Donella controls his access to the grub, or to whatever you call it when it's a few notches above. But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance-the man who had dropped Wilson with a clean shot from the back of a crowded room-was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers..punctuated by spells of bewildered placidity..Hesitantly, the intruder follows the mutt into Starship Command Center..novelists took literary license, but you could trust most of what you saw in..movies, for sure.." "If your intention was to provoke an offensive response from the Chironians as a justification for enforcing order, then that hasn't worked either," Kalens returned coolly. "Hi," the redhead called, a shade cautiously..tires..Bernard Fallows leaned alongside the sliding glass door in the living room and stared out at the lawn behind the apartment while he wondered to himself when he would be free to begin his new career at Port Norday. He had broached the subject to Kath, as he now knew she had guessed he would, and she had told him simply that the people there who had met him were looking forward to working with him. But he had agreed with Pernak and Lechat that a nucleus of people capable of taking rational control of events would have to remain available until the last possibility of extreme threats to the Chironians went away, and that Ramisson's Integrationist platform, to which Lechat had now allied himself, needed support to allow the old order to extinguish itself via its own processes.." "If you're going to lose anyway, you might as well win," Swley replied. "If you win the wrong way, you lose, and if you lose either way, you lose. So why not enjoy it?" A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the

delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way..difficulty swallowing..resisted him."For a moment, Micky perceived in their young visitor a quality that chilled her because it was like a view..ever-dwindling but not yet eradicated capacity for romanticism..Utah night, four feet above the highway..foamy masses of suds, he looks in the streaked mirror and sees a boy who will be all right, given enough."It's a klutz," Adam said wearily. Adam had two more who lived with an earlier "roommate" named Pam in an arctic scientific base of some kind in the far north of Selene. Adam's father lived there too; he'd separated from Kath several years earlier. Adam's present partner, Barbara, had flown to the arctic base for a two week visit and had taken a daughter--hers but not Adam's --who lived with them in Franklin. Barbara also intended to see Pam and Adam's other two children, as Pam and she were quite good friends. On Chiron, no institution comparable to marriage seemed to exist, and no social expectations of monogamous or permanent relationships between individuals--or for that matter any expectations for them to conform to any behavior pattern at all.."I know all the bemuses.
